## WOOD PRODUCTS AND APPLICATIONS FOR US LUMBER BROKERS

SOUTHERN YELLOW PINE | Hand-selected with virtually no knots, roughness or coarseness of grain. Smooth and consistent for high end requirements. Recommended for home construction, decking, landscaping or poles/posts. Most seen in accent walls, custom siding and rainscreens.

WESTERN RED CEDAR | Hand-selected with virtually no knots, roughness or coarseness of grain. Smooth and consistent for high end requirements. Beautiful on accent walls, siding, soffits and reflective ceiling plans.

HEMLOCK | Straight grain, easy to work - can be glued and screwed. Recommended best for accent walls, soffits, cabinetry, framing, flooring and molding.

DOUG FIR | Strong and durable. Used best in structural applications that are required to withstand high loads.

ENGINEERED WESTERN RED CEDAR | From 100% old growth and eco-friendly. Manufactured product with a manufacturer warranty. Vertical grain with 'micro v' at lower costs than solid cedar. Approved for exterior siding and soffit.

IPE | Hardwood that is extremely durable, dense, beautiful and natural. Stands up well in tropical and difficult Texas climates. Best in exterior siding, decking, soffits and fencing. Interior usage; ceiling and wood flooring.

MASSARANDUBA | Durable and long-lasting. Lumber planes are very smooth allowing for nails and screws. Recommended best in exterior siding, decking, porches, stairs, soffits and fencing. Interior usage; ceiling and wood flooring.

GARAPA | Decking application has a slight ribbon, watery, wavelike, or silky appearance. Does not shrink or easily splinter. Best used in exterior siding, decking, soffits and fencing. Interior usage; ceiling and wood flooring.

TIGERWOOD | This material can damage easily with unskilled labor. We recommend using carbide-tipped cutting tools like, US Lumber Brokers silver lightning blades. Nails can be used with pre-boring. Paneling, soffits, wains coating and hardwood siding, decking and rainscreens are most used areas of application.

CUMARU | Very little maintenance, available in longer lengths and a broad range of potential colors. Most seen in exterior siding, decking, soffits and fencing. Interior usage; ceiling and wood flooring.

TRUSTILE DOORS | Short lead times with no sacrifice in quality. Can easily design doors that fit any project and built to order to exact specifications.

PANDA WINDOW SYSTEM | Innovative designs with full range of options and finishes for residential and commercial projects. Fully customized design process allows limitless configurations and capabilities in aluminum and wood cladding frames.

ARCADIA WINDOW SYSTEM | Performance products, comply with the LEED for Core & Shell Rating System. Steel frames and glazing options. Ability to design custom solutions at cost savings and better end products.

WESTERN WINDOW SYSTEM | Aluminum frame technology and a simulated steel line. Thermally broken aluminum and high performance glass for energy efficiency. Glass glazing options are available.
